LEGEND

REBORN IN AIRSOFT

The classy Dan Wesson model 715 double-action revolver is back in production. For revolver lovers, that is big – and welcome news! This highly accurate Airsoft gun replica features all the details that you will find on the real firearm. From the one-piece 6-inch heavy barrel, complete with vent rib with threading for mounting accessories, to the imitated Hogue rubber grip. The grip shell has an ingenious integrated tool for tightening the CO₂ cartridge that powers the revolver.

Even the forward cylinder latch and the clockwise rotation of the cylinder have been precisely replicated from the real firearm. Dan Wesson revolvers became legendary as the preferred choice of serious revolver hunters and competition shooters because of the high quality and accuracy – and now, the legend has been reborn in an ActionSportGames Airsoft revolver.

ACCESSORIES

ULTRAIR® CO₂ CARTRIDGES WITH LUBRICANT

These lubrication cartridges can be used in all CO₂ powered Airsoft guns using a 12g CO₂ cartridge. In addition to the CO₂ gas, the cartridges are also filled with 0.8g of silicon oil that cleans and lubricates the valve while shooting, and at the same time provides all moving parts of the gun with a layer of oil that lowers friction and wear, resulting in smooth action, consistent accuracy and increased lifespan of all parts
