OUR NEW FLAG SHIP IN THE CZ FAMILY LINE OF PISTOLS

The ASG CZ Shadow 2 CO₂ Airgun pistol takes its styling from its real steel counterpart and delivers on all the same great features

The slide is crafted out of anodized aluminium and features a less rounded and more angled design with a slight weight increase due to a wider slide. The added weight and sharper design of the slide eases recoil management and allows for more precise shots on the target. The serrations on the slide are deeper and more pronounced, thus giving the shooter a firmer grip when racking the slide. The checkering at the front and back of the pistol grip is also more defined and when combined with the CNC machined zinc shells, which

are thinner in profile, they promote a much better wrap around the pistol grip. The trigger guard has also been extended for easier trigger access and to allow smoother operation when wearing gloves. The Shadow 2 also features a new grip angle cut, which is deeper at the beaver tail. Along with a new undercut at the trigger guard, this lets the Shadow 2 sit more firmly in the shooter's hand and promotes a better recoil management. The enlarged magazine release catch is adjustable with three available positions which can be set using only a hex key. The magazine catch has a more pronounced profile to give the shooter a positive confirmation when pressing the catch.

CZ SHADOW 2 – blowback

- Used by IPSC World Champions
- Designed for high accuracy
- Adjustable mag release
- Fiber optic front sight
- Adjustable hop-up

Box of 12 pellet CNC cartridges

These cartridges are made from steel and polished brass with Dan Wesson engraved at the base. The weight, feel and look of these are as close to real .357 hollow point revolver cartridges as you can get. Each holds one 4.5mm pellet and the large gas conduit allows more gas to pass through increasing muzzle velocity.

DW VALOR

- CO₂ powered
- Non-blowback
- Unique 2x6rd magazine drum system
- Dual safety feature – thumb grip and manual
- Classic design

Dan Wesson
DAN WESSON FIREARMS®

The classic Valor is an iconic and timeless design still highly popular with 'Real Steel' shooters. The Dan Wesson Valor Airgun is no exception and will give Airgun shooters a real showpiece along with a great shooting experience. It boasts not only a powerful and precision loaded shooting performance, but also utilizes a closed non-blowback system which makes full use of the CO₂ cartridge. The magazine uses a

unique rotatable pellet 2x6rd drum system. Once the drum is empty, simply take out the magazine and rotate the switch to set up the loaded drum and insert the magazine again. The magazine holds the CO₂ cartridge and is easily installed along with the pellets. The weight of this replica DW Valor is very close to the firearm version, giving it an authentic look and feel just like the real thing.

CZ P-09

– DT FDE BLOWBACK

- 3-Dot sights
- Rifled barrel
- Accessory rail
- Double rotary stick magazine (2x8 rd.)

Realism Precision Performance

The CZ P-09 is a full-size tactical pistol with an integrated rail for mounting light and/or laser modules. Manufactured under license from CZ this airgun is designed from the original specifications resulting in both realistic looks and handling. Its blowback function makes the metal slide move with every shot fired, creating strong recoil and adding to the shooting experience.

The CZ P-09 features a rifled inner barrel allowing the use of pellets which improves range and precision, further aided by a 3-dot sight system that gives the operator a quick and easy

target acquisition. Every pistol comes with its own unique serial number and authentic CZ markings. A barrel extension tube can easily be threaded on by removing the front caps. (ref. 15924 and 15925).

The CZ P-09 is one of a new generation of airguns capable of firing flat-head pellets from an ingenious stick magazine with a 2x8 capacity. It is powered by a 12g CO₂ cartridge for reliable and consistent performance, coupled with a comfortable ergonomic design, this airgun delivers a quality shooting experience.

The CZ P-09 is a full-size version of the popular P-07 compact pistol from CZ. The CZ P-09 has a rifled barrel which makes it even more precise. This pistol is capable of using both BBs and pellets, making it a very versatile Airgun. The CZ P-09 airgun was designed with access to the original CZ blueprints and designs which means that this replica is as close to the real thing as possible.

The CZ P-09 was designed for use by both law enforcement and armed services, and has therefore undergone rigorous stress tests, tests in which the firearm impressed users with its reliability and accuracy. When designing the polymer frame for the CZ P-09, the decision was made to retain the basic grip shape (circumference, angle, etc.) already very popular with operators of the CZ 75 family of handguns.

CZ SP-01 SHADOW

– Non blowback

- Accessory rail
- Non-blowback
- Barrel threaded for barrel extension tube
- Light weight

This exciting new airgun is based on the new generation of CZ 75 SP-01 pistols. These pistols have been created based on input from Law Enforcement, Military and Police communities worldwide, and with additional input from the Team CZ world premier shooters Angus Hobdell and Adam Tyc. The pistol frame which comes from a new mould incorporates alterations such as a recess beneath the trigger guard and a beavertail to enable a higher grip of the handgun. Sights consists of a fiber optics front sight and rear sight to promote much easier, faster and more accurate target acquisition. Adam Tyc, member of the CZ Shooting Team, used the

SP-01 to achieve at the IPSC shooting events (Production Division) the title of the World Champion (2005, 2008), European Champion (2007) and he is also winner of Australasian Games (2004, 2007).

Features:

The design is based on the proven CZ 75 line of pistols. MIL-STD-1913 accessory rails for fitting tactical lights and lasers. The front of the trigger guard is provided with serrations and the front strap is also serrated for better grip. Checkered rubber grip panels.

CZ SP-01 SHADOW

– Blowback

- Fiber optic front sight
- Comfortable rubber grip
- Front rail to mount accessories
- Sturdy construction
- Metal slide

The CZ SP-01 SHADOW is an exciting new CO₂ powered airgun based on the latest generation of pistols from CZ, designed from input provided by Law Enforcement, Military and Police communities worldwide, and with additional input from the world premier shooters of Team CZ.

This is a blowback pistol with realistic weight and recoil. It is easy to operate and the ergonomic grip with checkered rubber grip panels make it sit extremely well in the hand. It features a fiber optic front sight and an accessory rail.

- CO₂ powered

CZ 75 P-07 DUTY

– Non blowback

- Metal slide
- Non-blowback
- Accessory rail
- Barrel threaded for barrel extension tube

The CZ 75 has long been known for its superior ergonomics. This fully licensed 4.5mm Airgun is an accurate replica in both form and function, it sits perfectly in the hand and its realistic blowback action powered by CO₂ / Air, will provide hours of shooting fun. Full metal construction, just like the real gun all outer components are made of metal, which ensures a solid pistol with an ultra-realistic appearance.

CO₂ / Air compartment in the full size realistic magazine (CO₂ / Air cartridge not included)

The internal mechanisms have been designed to be simple, durable and reliable, and the chrome metal outer barrel adds an attractive contrast to this CZ 75.

The CZ 75 P-07 DUTY is the new generation of the CZ 75 family which was first designed back in 1975 by the famous small arms manufacturer Česká zbrojovka, Czech Republic. This is the semi-automatic 4.5mm (.177) airgun version fully licensed by CZ. It is powered by a 12g CO₂ / Air cartridge stored in the grip using the easy-load system and the ammunition is loaded in the drop-out magazine.

The CZ 75 P-07 DUTY is a compact tactical upgraded version compared to the standard CZ 75. Besides being more compact in size the P-07 DUTY has an integrated front rail for mounting light and laser units. The grip and metal slide carry authentic CZ markings and every gun comes with its own unique serial number.

- Rubber grip

CO₂ / Air compartment in the grip
(CO₂ / Air cartridge not included)

A black version of the semi-automatic 4.5mm (.177) CZ 75D Compact, licensed by Česká Zbrojovka, Czech Republic. The airgun has authentic CZ markings and a unique serial number. The front accessory rail gives you the opportunity to mount laser or flashlight units. The rear sight is adjustable to ensure better accuracy. The magazine holds 17 BB's and also stores the 12g CO₂ / Air cartridges.

The magazine is protected with a rubber base, to prevent accidental damage if it is dropped. The grip is rubberised and combined with the high rise beavertail, it secures a firm grip with perfect control. The pistol comes with a tool allowing you to change the CO₂ / Air cartridges in the magazine and unscrew the front to reveal the threads for fitting a barrel extension tube.

Metal slide and Blowback

This BP9CC is a semi-automatic non-blowback 4.5 mm Airgun fully licensed by BERSA®. It is a lightweight, compact, ultra-thin handgun, with an ergonomic design that improves line of-sight. It is powered by a 12g CO₂ / Air cartridge stored in the grip using the easy-load system and the BB's are stored in a removable stick magazine. An integrated picatinny rail allows for mounting of lasers or tactical lights. The grip and metal slide carry authentic BERSA® markings and every gun comes with unique serial number. The BP9CC (Concealed Carry) is the first polymer frame handgun from BERSA® the

Argentinian firearms manufacturer, known world-wide for producing reliable, affordable handguns. Since 1958, BERSA® has been manufacturing accurate, reliable, and robust handguns, utilizing advanced firearms technologies paired with a history of innovation. The Argentinean Military, as well as law enforcement officials around the world, have routinely issued and relied on BERSA® handguns as their official sidearm. BERSA® is currently one of the largest privately owned corporations in Argentina.

X9 CLASSIC

– Blowback

- Full size magazine
- Classic design
- Full metal
- Blowback

Standard 16 rd. magazine
ref. 18527.

The X9 is a full-size Airgun pistol with a classic design. The X9 is a high quality built Airgun that features a hard blowback function that makes the Airgun look and handle just like the real thing.

The realistic Blowback function makes the slide move back and load a new 4.5 steel BB into the chamber, thus adding a recoil and a more realistic shooting experience. The slide locks back on the last shot, requiring you to manipulate the

slide lock or the slide itself when inserting a full magazine. The magazine holds 16 4.5 steel BBs. The texturized grip allows for better pistol control and target acquisition. Every pistol comes with its own unique serial number. It is powered by a 12g CO₂ cartridge for reliable and consistent performance, coupled with a comfortable ergonomic design, this airgun will deliver a quality experience.

Designed especially for all Dan Wesson Revolvers. Shoulder holster for revolvers with two speed loader pouches. Size is fully adjustable allowing you to wear the holster concealed or overt. This holster can quickly be changed for either left or right handed players. Retention strap with push button snaps open for a fast draw. An additional safety strap keeps the gun securely in the holster during the most rigorous activities.

Black Ref. 16494

Shoulder holster, STI, CZ, STEYR, BERSA

Shoulder holster with mag pouch. Padded mesh shoulder panels allows the body to breathe for maximum comfort. Size is fully adjustable allowing you to wear the holster concealed or overtly. This holster can quickly be changed for either left or right handed players. Retention strap with push button snaps open for a fast draw. An additional safety strap keeps the gun securely in the holster during the most rigorous activities.

Black Ref. 11965

Belt holster, STI,CZ,STEYR, BERSA

Pistol belt holster with mag pouch. This holster can quickly be changed for either left or right handed players. Retention strap with push button snaps open for a fast draw. An additional safety strap keeps the gun securely in the holster during the most rigorous activities

Black Ref. 11963
OD green Ref. 17019

Belt holster 6" & 8" revolvers

As with the smaller version, this belt holster has soft inner lining protecting the finish on your gun. For right-handed draw.

Fits: 6" and 8" Dan Wesson and the new DW 715 6".

Ref. 17350

Dan Wesson handgun carry bag

Stylish carry bag designed especially for the Dan Wesson 715. (Will however fit most handguns even with optical sights). The convenient double zipper opens to reveal a surprisingly roomy bag with a separate padded compartment with Velcro closure, for storing the handgun and elastic loops for holding six speed-loaders or magazines. Furthermore, there are three mesh pockets for holding targets and ammunition

Ref. 18432

Thigh holster, STI, CZ, STEYR, BERSA

A fully adjustable thigh holster, with mag pouch. The rigid height adjustable strap with side release buckle, lets you place the holster exactly in the ideal position, for a fast draw. Double retention strap keeps the gun securely in the holster during the most rigorous activities. The side release buckles lets you take it on or off quickly.

Dot sights

Dot sight, 1x22-33, red

Dot sight, 1x22-33, red This multi red holo-sight has four different dots to chose between and can easily be changed on the rear selector. Each dot selection can be changed with seven different intensity levels. The dot sight has integrated 21 mm accessory/ weaver rail mount that fits most rifles and pistols. The front facing lens is coated with an anti-glare reflection. 22 x 33 mm (0.9 x 1.4 in.)

Ref. 15099

Dot sight, 1x21-17, red

Dot sight, 1x21-17, red This Low profile dot sight allows either a green or red dot to be projected into the lens. It has five levels of variable light brightness, and has integrated fixed sights as back up. The dot sight has a 21 mm accessory/weaver rail mount that fits most rifles and pistols.

Ref. 17129

Dot sights 1x, red

Classic military styled red dot sight available in two different sizes. 30mm and 40mm indicates the diameter of the objective lens. Both versions have 11 intensity settings and the red dot has both windage and elevation adjustment.

Dot sight, 1x, Ø30, red

Ref. 11096

The front facing lens is Anti-glare reflective coated. The integrated 21 mm mount allows you to mount the dot sight on standard accessory/weaver rails without any further accessories.

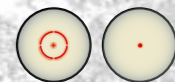

Dot sight, 1x, Ø40, red

Ref. 11097

Dot sight, red

The micro red dot sight is perfect for low profile weapon configurations. The bright red dot allows for fast target acquisitions. The Micro Dot is perfect for fast handgun action, steady shotgun aiming and compact rifles. Mounts easily on any picatinny rail using the included hex tool. Can be turned on/off with one hand.

Ref. 18475

Scopes & Mount rings

3-9X40 Scope w. mount ring

A variable powered rifle scope featuring a magnification that can be adjusted within a range of 3-9 times. Ideally suited for Air guns with 21mm rail.

Ref. 17372

4X32 Scope w. mount ring

For Air guns with 21mm rail.

Ref. 17371

3.5-10 x 50E Advanced scope

For Air guns with 21mm rail.
Mount ring included, Ø30

Ref. 17226

4x32 Scope w. 3-sided rail

For Air guns with 21mm rail.
Integrated Weaver/picatinny mounts.

Ref. 16294

Scopes & Mount rings

Scope, 4x20, 11 mm mount

A lightweight entry level scope ideally suited for Air guns with 11mm rail. Comes pre-fitted with mounts.

Ref. 11024

Scope, 3-9x40, w. high 11 mm mount rings

Ø25, 4x21x11mm

Ref. 18604

Scope, 4x32, w. high 11 mm mount rings

Ø25, 4x21x11mm

Ref. 18609

Mount rings, high

Set of two high-profile rings each with two screws. Intended for mounting on airguns. Fits scopes and dot-sights with a 25.4mm (1 in.) body. Mounts on 11 mm rails. Ø25.

Ref. 18550

Mount rings

Set of two low-profile rings each with two screws. Keeps scope or dot-sight close to the rail. Intended for mounting on airguns. Fits scopes and dot-sights with a 25.4mm (1 in.) body. Mounts on 11 mm rails. Ø25, 4x20x11 mm.

Ref. 15070

Lights/Lasers

Universal laser

Universal laser compact rail mounted laser. Designed to fit a standard weaver rail, this laser unit will be perfect for any of the CZ or STI series featuring a rail system. Rugged lightweight construction, slides on easily, and stays tightly locked on with the aid of a retention spring. The laser is fully adjustable for windage and elevation and features an ambidextrous on/off switch that can be activated by the shooting or non-shooting hand. A rail at bottom of laser allows mounting of additional equipment like a tactical light.

Ref. 17184

Tactical light – Super xenon

Super bright tactical flashlight, perfect for pistols with a frame rail. The light can quickly be switched on and off via the rear facing switch. The flashlight is supplied with a belt clip, where the light can be held when not mounted on a pistol.

Ref. 16085

LED flashlight – Multifunction

LED flashlight – Multifunction. Multifunction LED flashlight with three modes of operation, full power, low power or strobe effect. Can be mounted on most Airguns with rails. Included is two special mounts, both lets you quickly click the flashlight on or off. A belt mount allows the flashlight to clip onto a belt, either for transport or to provide hands-free light.

Ref. 16927

Tactical light and laser, red

Combination light/laser, especially suited for pistols. Fits rifles with weaver rail. Operated via tail switch. It is possible to have only the light or the laser activated. Easy fast detachable mount, allows to quickly mount the light/laser on the handgun when needed.

Ref. 15927

Light with switch

This 3 Watt tactical LED light is compact, shockproof and water-proof. The light is switched on either with a button or pressure switch. The tactical light fits perfectly under your pistol or on the side of your rifle.

Ref. 16076

Tactical lights

Strike Systems Mini Flashlight, Tactical version, 361 lumens

The MINI is a compact flashlight tailored to the EDC carrying user while still having tactical capabilities as a weapon light with the included weapon mount for picatinny rails and tail switch.

Ref. 19255

Strike Systems Raider Flashlight, Tactical version, 980 lumens

The RAIDER is a all-around flashlight with a high output of 980 lumens. Perfect for EDC carrying users with tactical capabilities as a weapon light with the included weapon mount for picatinny rails and tail switch, the RAIDER is designed to be rugged and durable for all demanding situations.

Ref. 19256

Strike Systems Marauder Flashlight, Tactical version, 1020 lumens

The MARAUDER is a beast of a flashlight. Throwing an output of 1020 Lumens, it will illuminate darkness into daylight with ease. Built for EDC carry with tactical capabilities as well with the included mount and tail switch, the MARAUDER is a must have for anyone looking for an advantage during low light situations.

Ref. 19257

Ammunition

ActionSportGames offers 3 types of ammunition for our Airguns.

4.5 mm steel BB's

These spherical projectiles are intended for use in smooth bore barrels. They are typically used for backyard plinking, close range target practice and general training.

4.5 mm Pellets

4.5 mm Pellets Intended for use in rifled barrel airguns. Pellets are usually diabolo shaped; making them stable in flight, the thin skirt at the base expands in the barrel to catch the grooves resulting in a stabilizing spin making pellets ideal for long-range accurate target shooting and pest control.

4.5 mm plastic BB's

These lightweight plastic projectiles offer an even cheaper and safer alternative to steel BB's, due to the much reduced kinetic energy they impact on their targets. Great for beginners and indoor use.

BLASTER steel BB's

These 4.5mm chrome plated steel BB's are for target shooting and casual plinking. Intended for use in smooth bore airguns only. They are delivered in a practical plastic container with a filler nozzle that makes filling the airgun magazines fast and easy. Weight: 0.35 g, Caliber: 4.5 mm/.177

1500 BB's Bottle
Ref. 15936

BLASTER 4.5 mm plastic BB's

New plastic BB's for 4.5mm airguns. These innovative super light weight BB's are safer to use, due to them hitting the target with much less kinetic energy. And even better is their low price, making shooting much more affordable. Packaged in a sealed plastic container. Weight: 0.13 g, Caliber: 4.5 mm/.177

1000 plastic BB's
Ref. 17939

Diabolo pellets

ASG's Diabolo 4.5mm pellets are a basic flat head pellet type made from a clean refined lead, without admixture, which could affect the oxidation. The pellets are clean, free of debris and with a high metal shine. This keeps the shooters hands clean and what is more important prevents debris, from accumulating in the mechanism and barrel. Resulting in a flawless operation and extended lifetime of the weapon.

Weight: 0.47 g, Caliber: 4.5 mm/.177

200 pellets
Ref. 17637

We recommend only using the BLASTER BB's from ASG as we cannot guarantee the same high quality and consistency in diameter in other brands of BB's.

CO₂ and Air capsules

Ultrair® CO₂ cartridges with lubricant

Make cleaning and maintaining your CO₂ gun a breeze. The new lubrication cartridges from ASG can be used in all CO₂ powered Airguns using a 12 g CO₂ cartridge. In addition to the CO₂ gas, the cartridges are also filled with 0.8 g of silicon oil that cleans and lubricates the valve while shooting, and at the same time provides all moving parts of the gun with a layer of oil that lowers friction and wear, resulting in smooth action, consistent accuracy and increased lifespan of all parts

12 g, 5 pcs Ref. 17425

Ultrair® CO₂ cartridges

Each cartridge contains 12 g of CO₂, used to power all CO₂ powered Airguns.

12 g, 5 pcs Ref. 15545

Safety tips

Keep your finger off the trigger until you are ready to fire.

Treat all Airguns as if they are loaded until checked.

Wear appropriate eye and face protection when handling Airguns. (Simple safety glasses may be adequate when target-shooting).

Always use an appropriate carry case when transporting Airguns in public. Be responsible, other people might not recognize a replica gun for what it is.

Always clear the chamber after removing the magazine by firing the gun in a safe direction.

When not using the Airgun, remove the magazine and empty the chamber. Never use any pre-used or damaged BBs and pellets.

Laser sights are only sold in countries where local laws allow them.

Never aim a laser at the eyes of yourself or others.

Always wear safety goggles when using your Airgun.

Do not look directly into the gun barrel.

Never aim or shoot at people or animals. Always set the selector on "safe" position (except when you are ready to shoot a target).

Select a safe place for shooting. Avoid shooting in public places.

Do not disassemble gun yourself. Always contact your local retailer.
