Bersa BP9CC – Blowback & Non-blowback

The BP9CC (Concealed Carry) is the first polymer frame handgun from BERSA the Argentinian firearms manufacturer, known world-wide for producing reliable, affordable handguns.

This is a semi-automatic 6 mm Airsoft gun version fully licensed by BERSA. It is powered by a 12g CO₂ cartridge stored in the grip using the easy-load system and the BB's are put in a removable stick magazine.

The BP9CC is a lightweight, compact, ultra thin handgun, with an ergonomic design that improves line-of-sight. An integrated accessory rail allows for mounting of lasers or tactical lights. The grip and metal slide carries authentic BERSA markings and every gun comes with unique serial number.

Two versions of the BP9CC is available – a non-blowback and a blowback version. Blowback is a term used when the slide cycles back and forth when firing the gun, giving a more realistic feel and a sense of recoil.

Bersa BP9CC, CO₂ Airsoft pistols

Non-blowback version	Ref. 17307
Blowback version	Ref. 17308
Standard magazine	Ref. 17310
